Geographical skills

Research a country or part of the world and present your findings including the population.

Create a cartograph which shows global population.

Maths

Your family history – is there a family recipe that's been passed down through the generations? You could use the recipe to create a feast and make a scrapbook or poster to show us.

Research some global populations over time – plot them on graphs and present to us.

English

Write a recount of a person from the Victorian era – the time of the first census!

Write a story about someone in your ancestry (real or imagined!).

Home Learning Tasks

Year 6

Exploring the Archives

Changing Populations

Due: 16th December

History

Research your own family ancestry. Present in any way you would like!

Research the history of our school or local area. Present your findings.

Your Choice!

On this sheet, I have included some ideas of home projects you could work on; however, if you have an amazing idea for a project that I haven't mentioned, please have a go!

Have fun! Mrs Bugg

DT/Art

Design and create a historical map of a well-known or local area.

Design and create a historical record, a census, a birth certificate, a school log book or any thing you fancy! You could even make it look authentic using tea bags! Become an enumerator!

Use a quill to create a historical record – try your hand at old-style letters!
